METHODOLOGY FOR COLLECTING CASES OF RIGHTS VIOLATIONS

The report was compiled based on the protocol of the National report on violations of the rights of gay men, other MSM and trans* people, in particular the right to health. The basis for the national report is systematized information on cases of violations of the right to health (cases documented during the year) in Kyrgyzstan, collected using tools provided by ECOM and partner initiatives, as well as a brief analysis of the legal environment.

Several research methods were used as part of monitoring:

- Analysis of documented cases from the REAct database;
- Prepared appeals to paralegals;
- Analysis of thematic materials from open sources.

Goal of information collection: to identify cases of violations of the human rights, in particular the right to health, of gay, bisexual and other MSM, and trans* people.

As a result of the analysis, the main reasons for violations and discrimination were identified, and quantitative data was obtained. Conclusions and recommendations were developed based on this data.

NATIONAL LEGISLATION IN THE FIELD OF HEALTH

In Kyrgyzstan, the trend of amending legislation to impose greater restrictions on human rights continues. The amendments have affected the primary law, the Constitution. The form of government has changed, and the system of checks and balances of the principle of the separation of powers has been violated. Amendments were made to the Law of KR «*On non-profit organizations*»¹, according to which NGOs/non-profit organizations are required to provide an additional summary table of expenses and sources of income. Reports on the financial transactions of NGOs were always submitted to various competent state bodies in the past. Amendments to this law are currently ongoing, which may adversely affect the activities of NGOs in the field of health and human rights.

ANTI-DISCRIMINATION LEGISLATION

The Constitution of the Kyrgyz Republic guarantees equality for all citizens, and leaves the list of protected grounds open². SOGI is not mentioned in any NLA. On November 15, 2022, the Parliament submitted a draft law «*On ensuring the right to equality and protection from discrimination*» The law contains forms of discrimination, definitions, and a protection mechanism, but does not include SOGI as protected characteristics. There is no definition of a hate crime in the legislation of the KR, however, in some articles of the CC KR, the commission of a crime motivated by social, national, racial, or religious hatred or enmity is an aggravating circumstance⁴.

LEGISLATION IN THE FIELD OF HIV PREVENTION

The right to health is regulated by the Law of KR «*On protection of the health of citizens*». Legislation in the field of HIV prevention is considered one of the most progressive in Central Asia. The rights of PLH are guaranteed by a separate Law «*On HIV/AIDS in the Kyrgyz Republic*». This law guarantees the equality of PLH and prohibits discrimination.

Although there are friendly staff who have been trained to work with LGBT people and PLH in the country's large AIDS centers, in other regions and among other types of specialists, stigma and discrimination against PLH and LGBT people continue to exist. The country is updating its HIV program, and has involved people from key communities in this work.

CRIMINALIZATION OF HIV TRANSMISSION

Article 143 CC KR⁵ not only criminalizes the transmission of HIV, but also «*putting another person at risk of contracting HIV*». It is not clear whether this article applies to cases where preventative measures in the form of ARV treatment and condoms were used. Thus, all persons living with HIV who have sex can be held criminally liable, which violates their right to sexual health. However, a person is not liable if they warned their partner that they are infected with HIV.

LEGAL GENDER RECOGNITION

For many years, KR has been one of the most progressive countries in EECA in terms of changing one's gender marker. Currently, Article 34 of the Law of KR «*On acts of civil status*»⁶ does not provide for the legal possibility of making changes to civil status records in registry offices. Due to the lack of a quick and transparent procedure for changing one's gender marker, trans* people must go through pre-judicial and judicial procedures in order to obtain birth certificates, and subsequently identity documents, with the desired gender marker in order to ensure the full enjoyment of their lives.

There was a case where a trans* person applied to a court to establish that the information contained in their birth certificate was incorrect. The court granted the application, and the person was able to change their gender marker. However, there was also a similar case where a trans* person's application was not granted by the court, and they were not able to change their documents⁷.

CONCLUSIONS AND RECOMMENDATIONS

In total, ECOM monitors recorded 31 cases of violations of the rights of LGBT people in Kyrgyzstan in 2022. Of these, 12 cases relate to discrimination by medical personnel; the majority of the victims are PLH. In all cases, medical staff who found out about a victim's SOGI or HIV status used derogatory language, and, in some cases, refused to provide necessary medical services.

7 cases relate to "fake dates" organized by law enforcement agencies and a hate group. Law enforcement officers met the victims through social networks, invited them on a date, and in almost all of the cases, subjected the victims to extortion, blackmail, threats of outing, and insults. In one of the cases, an employee of the SCNS committed violent acts of a sexual nature against the victim.

In 4 cases, violations were committed by employers; in 3 cases, the victims were fired or forced to quit because of their SOGI or HIV status, in 1 case, the potential employer required a certificate of HIV status. In all 3 cases, dismissals were accompanied by insults and derogatory remarks from management or colleagues.

Another 6 cases relate to different types of violations under different circumstances; in 2 of them, queer people were victims of domestic violence due to their SOGI.

In general, the victims are PLH, who are often also LGBT people. The second category of victims are homosexual men of different ages who are looking for partners on social networks.

Generally, offenders are employees of medical institutions, as well as representatives of law enforcement agencies.

Of all the cases analyzed, in only one instance did the victim turn to law enforcement agencies before contacting a public organization. However, even in this case, the law enforcement officer responded with physical violence. In all cases, the victims either feared being outed or did not trust law enforcement agencies, and, therefore, refused to file statements.

THE KYRGYZ REPUBLIC

- Include health status (HIV status), sexual orientation and gender identity as protected grounds in the draft law «On ensuring the right to equality and protection from discrimination»;
- Conduct training activities for law enforcement officers and medical workers providing services for LGBT people and PLH.
- Promptly and effectively investigate any allegations of violence or intolerance motivated by sexual orientation, gender identity, or HIV status;
- Establish an effective and friendly mechanism for gender transition for trans* people;
- Conduct monitoring of violations of the right to labor in relation to PLH.

CIVIL SOCIETY ORGANIZATIONS

- Document cases of violations of the human rights of LGBT people and PLH;
- Publish such data in open sources;
- Carry out advocacy to restore the right of trans* people to legal gender recognition;
- Support communities in conducting strategic litigation to restore rights and freedoms.
